This product is for use in:
1. (associated with AIDS), Influenza virus H1N1, respiratory syncytial virus, Herpes simplex virus type 1, carbapenem resistant Staphylococcus aureus, Pseudomonas aeruginosa, Klebsiella pneumoniae, Staphylococcus epidermidis, Escherichia coli O157:H7, nonporous, inanimate surfaces:

IN THE EVENT OF A MEDICAL EMERGENCY CALL YOUR POISON CONTROL CENTER AT
Call a poison control center or doctor for treatment advice.

FIRST AID: IF IN EYES:
- Rinsing with water
- Do not rub

FIRST AID: IF INHALED:
- Get fresh air
- Remove to a place with plenty of air
- Seek immediate medical attention

FIRST AID: IF ON SKIN OR CLOTHING:
- Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes.

FIRST AID: IF SWALLOWED:
- Do not give anything by mouth to an unconscious person.

INFECTION CONTROL:
- Personal Protection:
  - Wear gloves, masks, and eye protection when in areas known to be contaminated with blood or body fluids.
  - Follow standard precautions for infectious disease control.

SPECIAL INSTRUCTIONS FOR CLEANING AND DECONTAMINATION AGAINST HIV-1 OF NONPOROUS, INANIMATE SURFACES:
- First, clean all surfaces of infectious material. Then, disinfect with a solution containing 4,306 ppm available chlorine.

DECONTAMINATION FOR SURFACES CONTAMINATED WITH HIV-1:
- Dilate the product in water:
  - Use at a 1,000 ppm solution for general decontamination.
  - Use at a 4,306 ppm solution for bloodborne pathogens.

DECONTAMINATION FOR SURFACES CONTAMINATED WITH HIV-1 AND BLOODBORNE PATHOGENS:
- Dilute the product in water:
  - Use at a 2,000 ppm solution for general decontamination.
  - Use at a 8,612 ppm solution for bloodborne pathogens.

DECONTAMINATION FOR SURFACES CONTAMINATED WITH HIV-1 AND ANIMAL PATHOGENS:
- Dilute the product in water:
  - Use at a 4,306 ppm solution for general decontamination.
  - Use at a 10,612 ppm solution for bloodborne pathogens.

DECONTAMINATION FOR SURFACES CONTAMINATED WITH HIV-1 AND ENVIRONMENTAL PATHOGENS:
- Dilute the product in water:
  - Use at a 4,306 ppm solution for general decontamination.
  - Use at a 8,612 ppm solution for bloodborne pathogens.

DECONTAMINATION FOR SURFACES CONTAMINATED WITH HIV-1, BLOODBORNE PATHOGENS, AND ENVIRONMENTAL PATHOGENS:
- Dilute the product in water:
  - Use at a 10,612 ppm solution for general decontamination.
  - Use at a 16,912 ppm solution for bloodborne pathogens.

SPECIAL INSTRUCTIONS FOR CLEANING PRIOR TO DISINFECTION AGAINST HIV-1:
- Remove gross contamination before cleaning. Do not use this product on critical or semi-critical medical devices prior to sterilization or high level disinfection. This product is a Healthcare disinfectant when used at level of 4,306 ppm available chlorine and is intended for use under the following conditions:

PRECAUTIONS:
- Avoid contact with any eyes, mucous membranes, or broken skin.
- Keep out of reach of children.
- Use in a well-ventilated area. Avoid breathing the fumes.

DIRECTIONS FOR USE:
- For best results, use this product in a well-ventilated area. Do not use in areas where there are at least 10 people per 100 square feet.

IN 4 MINUTES:

KILLS:
- 99.9% of viruses and bacteria
- Food Contact Sanitizer
- Neutral pH

Solutions® is a registered trademark of Total Solutions, Inc.

Other Ingredients:
- Glycerin

Active Ingredients:
- Sodium hypochlorite

MATERIALS:
- Biodetergents and other body fluids

Available Chlorine concentrations.
* Equivalent to 31.10% active chlorine by tablet weight. Refer to dilution chart.

Registration No. 154798

PRECAUTIONARY STATEMENTS
- DANGER: Corrosive. Causes irreversible eye damage. Harmful if swallowed, inhaled, or absorbed through the skin. Avoid contact with skin, eyes, mucous membranes, and clothing. Use in a well-ventilated area.

INSTRUCTIONS FOR USE:
- Read and understand the label and use in strict accordance with precautionary statements and directions.
- This product is for use in a well-ventilated area. Do not use in areas where there are at least 10 people per 100 square feet.
- Avoid contact with any eyes, mucous membranes, or broken skin.
- Keep out of reach of children.
- Use in a well-ventilated area. Avoid breathing the fumes.

OTHERWISE, USE ONLY AS DIRECTED.
- Do not use on food contact surfaces or in food processing equipment.
- Do not use on food or food contact surfaces.
- Do not use on any surface that will contact food, food contact surfaces, or food and water contact surfaces.

STORAGE AND DISPOSAL:
- Store in a cool, dry, well-ventilated area. Avoid exposure to heat and moisture.
- Do not store in the presence of corrosive substances.
- Do not store in the presence of strong oxidizing agents.
- Do not store in the presence of strong reducing agents.
- Do not store in the presence of strong acids or strong bases.
- Do not store in the presence of strong alcohols or strong organic solvents.
- Do not store in the presence of strong detergents or strong surfactants.
- Do not store in the presence of strong oxidizing agents or strong reducing agents.
- Do not store in the presence of strong acids or strong bases.
- Do not store in the presence of strong alcohols or strong organic solvents.
- Do not store in the presence of strong detergents or strong surfactants.
- Do not store in the presence of strong oxidizing agents or strong reducing agents.
- Do not store in the presence of strong acids or strong bases.
- Do not store in the presence of strong alcohols or strong organic solvents.
- Do not store in the presence of strong detergents or strong surfactants.
- Do not store in the presence of strong oxidizing agents or strong reducing agents.
- Do not store in the presence of strong acids or strong bases.
- Do not store in the presence of strong alcohols or strong organic solvents.
- Do not store in the presence of strong detergents or strong surfactants.
- Do not store in the presence of strong oxidizing agents or strong reducing agents.
- Do not store in the presence of strong acids or strong bases.
- Do not store in the presence of strong alcohols or strong organic solvents.
- Do not store in the presence of strong detergents or strong surfactants.
- Do not store in the presence of strong oxidizing agents or strong reducing agents.
- Do not store in the presence of strong acids or strong bases.
- Do not store in the presence of strong alcohols or strong organic solvents.
- Do not store in the presence of strong detergents or strong surfactants.
- Do not store in the presence of strong oxidizing agents or strong reducing agents.
- Do not store in the presence of strong acids or strong bases.
- Do not store in the presence of strong alcohols or strong organic solvents.
- Do not store in the presence of strong detergents or strong surfactants.
- Do not store in the presence of strong oxidizing agents or strong reducing agents.
- Do not store in the presence of strong acids or strong bases.
- Do not store in the presence of strong alcohols or strong organic solvents.
- Do not store in the presence of strong detergents or strong surfactants.
- Do not store in the presence of strong oxidizing agents or strong reducing agents.
- Do not store in the presence of strong acids or strong bases.
- Do not store in the presence of strong alcohols or strong organic solvents.
- Do not store in the presence of strong detergents or strong surfactants.
- Do not store in the presence of strong oxidizing agents or strong reducing agents.
