# **Turf King**

### Product #322

Emulsifiable concentrate with Prometon

A non-selective, total kill herbicide designed for use where control of all vegetation is desired. Since most of the activity is done through the roots, it is emulsifiable and requires adequate rainfall to move the herbicide into the root zone. It is only recommended for non-cropland areas away from residential/recreational areas, outside of the drip line of trees and away from the roots of desired plants, brush, foliage and trees.

#### Non-Selective Herbicide With Residual control:

- Along pipelines
- Railroad rights-of-way
- Loading rampsParking lots
- Around buildingsIndustrial sites

- Fence rows
- Storage yards
- Tank farms

#### **Features and Benefits**

- Quickly and effectively eliminates all vegetation
- Under normal conditions, a single application stops weeds from coming back for one growing season
- Ideal for use on non-cropland area
- The degree of control and duration depends on the amount of herbicide applied, soil type rainfall and other conditions

Properties Appearance	Reddish-brown liquid	<b>Directions</b> Complete directions on product label <b>Typical Application:</b> Mix 1 gallon with 10 gallons of water and apply over 1000 sq
Fragrance	Fuel oil	ft.
