RINSE AID

For Gleaming Glasses,
Silverware and Tableware

- IN HARD OR SOFT WATER
- BIODEGRADABLE

DESCRIPTION

This concentrated rinse additive is designed for use in the rinse water of dishwashing operations. It reduces the surface tension of water to prevent water droplets from forming, allowing dishes, silverware and glasses to dry sparkling clean and spot-free. This formula contains special softening agents for superior performance in hard water.

DIRECTIONS

For use in machines equipped with automatic rinse injectors, keep the liquid reservoir filled according to manufacturer's recommendations. Adjust feed rate of rinse additive to smallest amount that gives desired results.

For dishwashers without rinse injectors, add two teaspoons of rinse additive to the final rinse.

For hand dishwashing, use two teaspoons per 3 gallons of hot water.

DISPOSAL

Offer empty container for recycling. If recycling is not available, discard container in trash.

KEEP OUT OF REACH OF CHILDREN

NET CONTENTS: One Gallon (128 fl. oz.)

Manufactured By: Total Solutions® • 1-800-743-6417
