TOTAL SOLUTIONS®

RESILIENT FLOOR CARE

EXCELNon-Alkaline Floor
Cleaner Concentrate

- CLEANS WITHOUT DULLING FINISH
- WORKS WELL WITH MOPS OR AUTOSCRUBBERS

KEEP OUT OF REACH OF CHILDREN**NET CONTENTS:** One Gallon (128 fl. oz.)Manufactured By: Total Solutions® • 1-800-743-6417
PO Box 240014 • Milwaukee, WI 53224 • athea.com**FLOOR CARE TIPS:**

- Floors should be damp mopped regularly. Accumulated dust and dirt cause unsightly scratches or abrasion that will significantly reduce finish durability and lead to frequent stripping and recoating.
- Floors should always be dry mopped before damp mopping. Removal of loose soil extends the life of cleaning solution significantly reducing chemical usage.
- Always pick up spills promptly. Dried-on liquids can be very sticky and require extra effort to remove. A little effort at the time of the spill will save a considerable amount of time during the damp mopping process.
- Regular use of walk-off mats at all entrances will catch damaging grit - significantly extending the life of your floor finishes.

DIRECTIONS

Dry mop floor with a treated dust mop to remove all loose soil.

MOP APPLICATION: In mop bucket equipped with wringer, dilute 2 - 3 ounces per gallon of warm water. Immerse mop into solution and wring out about one-half to two thirds of cleaner. Mop should not have water dripping off of it, but feel damp to the touch. Clean the floor using a gentle side to side motion, be certain to cover all areas of the floor. **NO RINSING REQUIRED.**

Heavier dirt accumulations of dried-on liquid spills may require a vigorous scrubbing action for complete removal. Floor with heavy soiling may require a stronger cleaning solution.

AUTOSCRUBBER APPLICATION: Dilute 1 - 2 ounces per gallon of warm water. Clean floor with a red pad, being certain to cover all areas of the floor. No rinsing required.

Heavier dirt accumulations of dried-on liquid spills may require a vigorous scrubbing action for complete removal. Floor with heavy soiling may require a stronger cleaning solution.

DISPOSAL

Offer empty container for recycling. If recycling is not available, discard container in trash.

Please Recycle.
