ICE ERASE

Liquid Ice Melt

Now Approved for Airport Runways

This advanced potassium acetate salt-based liquid penetrates quickly to dissolve frost, snow and ice accumulations from a wide variety of surfaces. It can also be used as a pre-treat up to 12 hours prior to storms to prevent accumulation. Its melting action does not generate any heat; it is non-corrosive and will not cause damage to surfaces or leave a residue; and it is non-burning to surrounding grass areas.

Ice Erase meets the requirements of "AMS 1435B Fluid, Generic, Deicing / Anti-Icing for Runways and Taxiways", making it an ideal solution for airport ice management on runways and taxiways.

PRODUCT FEATURES

- Alcohol-free potassium acetate formula
- Ideal as a pre-treat to prevent build-up of ice and snow for up to 12 hours
- Meets AMS 1435B standards for use on airport runways and taxiways
- Non-harmful to grasses
- Non corrosive, leaves no residue
- Effective in temperatures as low as -60°F
- Not intended or approved for use on airplanes

APPLICATIONS

- Approved for use on airport runways and taxiways

- Use as a pre-treat to prevent accumulations of ice and snow
- Ideal for applications where corrosive pellets and granular ice melters cannot be used
- Use to prevent ice dams on building structures

PRODUCT SPECIFICATIONS

- Gallons, pails, drums
- 50% potassium acetate
